Requirements/Permit Submittal Items

- 1.) Attach a site map depicting the limits, depth, and/or final elevation of fill/grading and the subject property lines. Base map can be supplied by the engineering department. Scale is to be not less than 1"=200'.
- 2.) Contact Racine County Planning regarding any necessary county permits.
- 3.) Estimated quantity of material being graded/filled _____ cubic yards or _____ square yards.
- 4.) Source and type of fill material.
- 5.) Haul routes need to be mapped.
- 6.) Restoration and erosion control measures.

Village Approval

Notes/Permit Conditions: _____

Approved: _____
(Village Engineer) (Date)

- Notes:
- 1.) Permit expires 180 days after the date of issuance.
 - 2.) This permit does not absolve the applicant of any other required state and local permits.
 - 3.) Fill may not be placed in any wetland and floodplain areas unless otherwise permitted through WDNR and US Army Corp. of Engineers.
 - 4.) Fill may not restrict or alter existing drainage patterns.
 - 5.) Free and unlimited access to the property being filled/graded must be provided to Town staff during the life of the permit.
 - 6.) Any costs associated with construction operations with damage to Town right-of-way or property, shall be reimbursed by the applicant.
